

Waterless Trap Seals for Floor Drains

LETS WATER FLOW DOWN KEEPS BUGS & ODORS OUT

The Mainline® Waterless Trap Seal is designed to be used in conjunction with a code approved trap seal (often referred to as a P-trap) in drainage systems including floor drains. Mainline® Waterless Trap Seal is available in four sizes: 2", 3", 3.5" and 4"

Typical applications for the Mainline® Waterless Trap Seal include 2", 3", 3.5" and 4" floor drains, basement drains, mop sink drains, and other types of drains used in maintenance areas. The Mainline® Waterless Trap Seal blocks harmful sewer gases and/or pests from entering a finished building space in the event that the P-trap is not sealed with an appropriate amount of liquid.

Waterless Trap Seal for Floor Drains

- Mitigates trap seal loss due to evaporation
- Prevents harmful sewer gases from entering building
- Protects against entry of vermin into habitable spaces
- Sealing rings on the outer edge of the Mainline® waterless trap seal will keep device in place for the life of the product while the inner flaps will open when liquids pour down the drain.
- ASSE 1072 rated AF-GW
- Rated for grease-laden waste applications

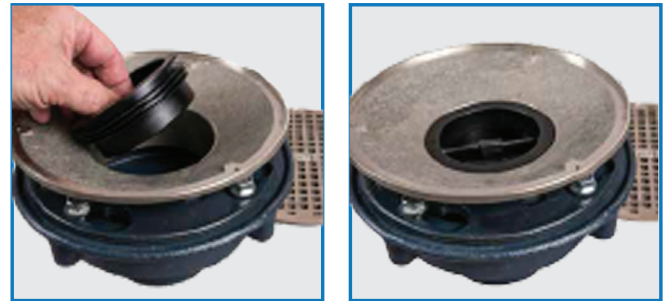

- A.** This barrier type floor drain trap seal protection device is not for use as a primary trap seal.
- B.** This product should not be removed from the packaging until it is to be installed.
- C.** Installation should be conducted in accordance with all local codes.
- D.** Mainline® inline waterless trap seal device shall not be used in lieu of a trap primer.

NEW CONSTRUCTION:

Remove drain barrel/strainer from the drain base and gently push waterless trap seal into the hub of the drain.
Replace the drain barrel/strainer.

RETROFIT:

Remove the strainer from the drain barrel and gently insert waterless trap seal into the barrel, making sure the strainer can be replaced without touching the waterless trap seal.

PRODUCT	DESCRIPTION	DEVICE SIZE		FLOW RATES	
		Inches	mm DN	GPM	L/M
